EZ Grout Corporation expands Fence Line With *Stretch-n-Go Hog*TM Fence Dispenser

Waterford, Ohio – EZ Grout Corporation, the makers of the Fence Hog® and Mobile Mud Hog® is rolling out their latest innovation, *Stretch-n-Go Hog*TM; a fence dispenser that can stretch up to ¼ mile of woven wire in one load as it dispenses, that's four 330 ft. rolls or two 660 ft. rolls of woven wire. The *Stretch-n-Go Hog*TM can triple the amount of fence that a fence builder can put up in a day's time, dispensing and stretching at a rate of 2 mph.

Developed with the assistance of a professional fencer, the *Stretch-n-Go Hog*TM was developed to satisfy customer requests for a machine that not only dispenses cumbersome rolls of woven wire, but stretches it, too!

The woven wire is loaded by a skid steer which means no more back breaking handling. Also, immediately after dispensing, the fence can be stapled directly behind the skid steer, making for faster more efficient work. Coated tension rolls were added to the *Stretch-n-Go Hog*TM to protect the woven wire during stretching and an adjustable brake system provides individual tension preferences for a variety of fencing jobs. The *Stretch-n-Go Hog*TM also features fork pockets on both sides to allow the operator to easily switch from side-to-side.

Bottom-line is the New *Stretch-n-Go Hog*TM Fence Dispenser will certainly revolutionize the fencing industry, making it easier and affordable for fencers to get their jobs done! EZ Grout Corporation is a proud member of the American Fence Association.
